Excerpt from Concise Latin Grammar
The purpose of the author in preparing this book has been to provide, in as concise a form as possible, a Latin grammar which should be of equal service to the high-school pupil and to the college undergraduate. To meet the needs of the former the fundamental and essential facts of the language have been stated as simply as possible and have been given due prominence on an open page. Statements of secondary importance appear in smaller type and all material that would be confusing to the beginner has been relegated to footnotes, and these have been reduced to a minimum. At the same time the scope of the book is such as to include all that is needed for translation of authors usually read in college. There is an obvious advantage to the student in using the same grammar throughout his Latin course. The needs of the student have been made the guiding principle in the treatment of the examples. These are numerous and have been taken by preference from the portions of Caesar, Cicero, and Vergil read in secondary schools. Furthermore, they have been simplified when too difficult for ready comprehension, without, however, destroying their validity. In the matter of grammatical nomenclature a conservative attitude has been taken, but such of the new terms have been adopted as seem likely to win general acceptance. Versification has been treated briefly and only the meters used by Vergil and Ovid have been explained. About the Publisher
