

The Tenth Planet: Book Three in the Cosmic Horizon Series

The final episode in the cosmic saga and the tangling of real events and fiction continue to provoke and poke us, the readers, to look again at who we are and what our purpose here might be. The depth and scale of the extraordinary alternative versions of Earth's history and man's true status in the cosmos continue to unfold, as the double agents are briefed and debriefed both on Earth and by their alien overseers. They find it increasingly difficult to keep their cover stories on Earth intact, experiencing extreme inner pressure from the sheer volume and implications of the information they are becoming privy to. Two new members join the group, recruited from the US. As the story unfolds, the reader is not immune to the deeply personal yet utterly alien revelations that each chapter reveals before the mind-shattering conclusion.
