

## Medical Research

Josh Hirst is a 22 year old medical student. Danny Waller is his 18 year old next door neighbour. Discover how Josh leads Danny deep into the world of Medical Research. 7200 words, approx. 25 pages\*\*This story contains graphic description of male/male sexual activity and must NOT be purchased by anyone who is under the age of 18\*\*EXCERPTExcellent, said Josh as he ticked the final box on the form on his clipboard. Lets get started. Firstly, I need you to strip so that I can weigh you. Danny obediently stripped down to his briefs. No, strip completely naked please. I need my research to be absolutely accurate. Hesitantly, Danny dropped his briefs, stepped out of them, and stood naked in front of Josh. He knew that he was blushing, but Josh acted very professionally as he led him to the scales and slid the weights along their runners until the little arrow floated at the end. Josh carefully noted Dannys weight on his clipboard, and then measured his height, waist and chest. All of Danny vital statistics were meticulously noted on Joshs clipboard. Now lie down on the examining table please.

? eXTReMe Tracker Personal Strength: Evolution Pro-Ana has Evolved. Ps-Evolution is a Pro Ana/Pro-Ana/ C.R.O.N. CRON Calorie Restriction for Optimum Nutrition resource and forum, seeking to include adult Pro-Ana, Pro Ana, proana, mia, C.O.E.
